River and Sea

Sultana said, "I live near a river. I love to watch the river flowing. It starts its journey on a mountain, follows a path and finally flows into the sea.

We use river water in many ways. Because of this, in olden days, people lived near rivers. Many kinds of fishes, crabs and birds live in and around the river. Sometimes boat races are also held in the river. My brothers like to participate in the boat races".

Word list

river, sea, path, boat race, salty
