Unit 3

Plants Around Us

You will learn about

- The parts of a plant
- Different kinds of plants
- Benefits of plants
- Trees as habitats for animals

Parts of a Plant

A group of students went on a field visit to a garden. Meena looked at a sapling closely and asked her teacher, "One part of this plant is green while the other part is brown in colour. Why is it so, teacher?"

The teacher explained, "Our body has different parts such as hands, legs and head. In the same way, plants also have different parts. They are of different colours. Let us learn about them".
