Let Us Discuss

Look at a plant. What do you see? Can you guess what the different parts of the plant do?

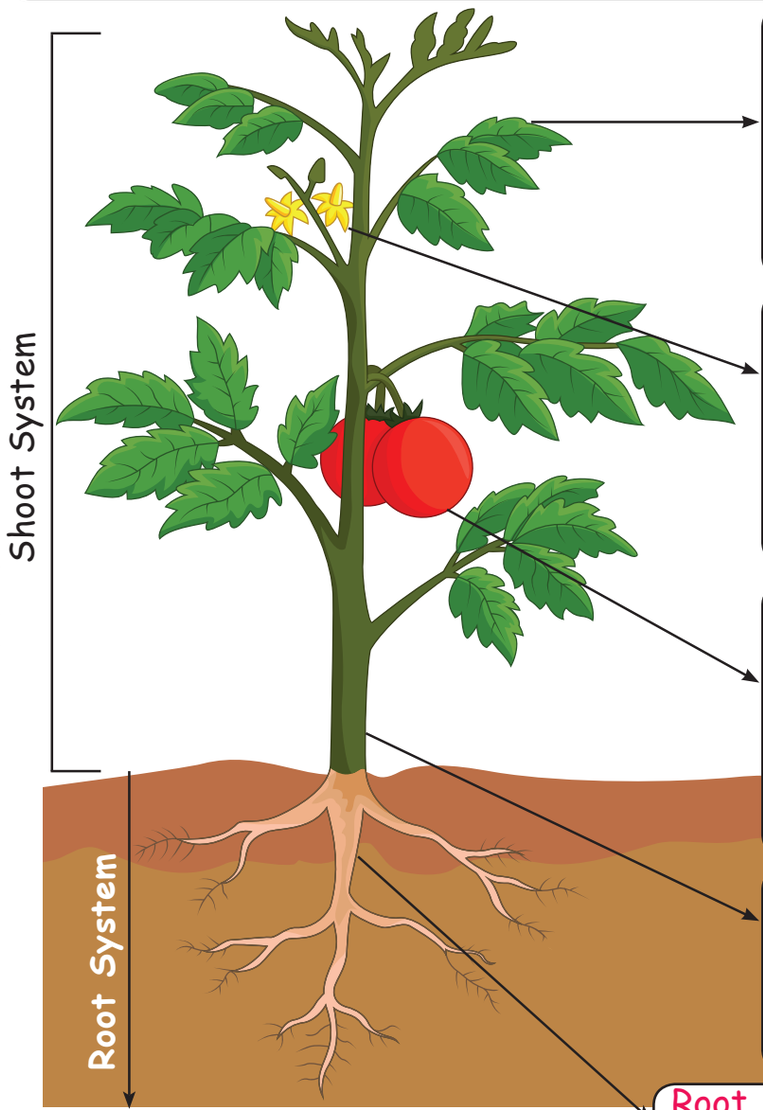

Every plant has a root and a shoot system.

Root System

The part of the plant that grows under the ground is called the root system.

Shoot System

The part of the plant that grows above the ground is called the shoot system. It consists of stem, leaf, flower and fruit.

Leaf
- Grows from the stem
- Most are green in colour
- Makes food for the plant

Flower
- Attractive, colourful
- Grows from a bud
- Has a specific smell
- Attracts birds and insects

Fruit
- Develops from the flower
- Some have seeds
- Most plants grow from seeds

Stem
- Main part of the shoot system
- Gives support

Root
- Fixes the plant in the soil
